(57.4) CPP TUBULAR CONTROL ARMS

Classic Performance Products announces the introduction of its brand new 1962-67 MINI™ Sub-frame Kits. Eliminating the factory strut rods, adding adjustable forward control arm mounts, these kit add stability, improved steering response and over 2" of ground clearance for your early Nova. By eliminating the bind of factory strut rods you are able to maintain proper alignment with out the use of a "Lock Out Plate" and gain a free working up and down motion in the lower control arm. The results are better ride quality and positive road feedback.

CPP's kits accommodate both the factory sway bar and aftermarket 1" bars (aftermarket 1-1/8 bars will not work). The one-piece crossmember ties both frame rails together by bolting in where the factory strut rod mounts were located, providing additional strength. It also adds only 2 lbs to the car after removing the heavy factory strut rods and bulky strut rod mounts. There is no cutting or welding required. The rear of the lower control arm mounts in the factory location and the original camber adjustments are used. The front of the lower control mounts to the new crossmember and adds a forward caster adjustment to guarantee a perfect, simple and hassle-free alignment.

The standard kit (#6267TCA-K)\$459.00 includes 2 one-piece 1-1/4" 120 wall DOM tubular lower control arms, simple bolt-in 1/4" thick steel cross member with forward mounting, 4 alignment cam kits, grade 8 hardware, and CPP's low friction, long life bushings and CPP's new premium lower ball joints. Our deluxe kit (#6267DTCA-K)\$1014.00 comes complete with standard kit, upper control arms, coil springs, rubber spring perches and shocks. Please specify stock height or 1 1/2" drop coil springs and black or silver arms when ordering this kit. The newest kit (#6267TCA-ULK)\$774.00 also includes our brand new upper control arms. (6267TCA-UK)\$349.00 These prices include shipping to the continental US.

(57.6) Heidt's New Superide II Nova Subframe

57611 Now you can have a SUPERIDE II™ SUBFRAME for your '62-'67 Chevy Nova from HEIDTS Hot Rod & Muscle Car Parts, the leader in suspension products in the Street Rod market. This is a fully bolt-on suspension subframe package with complete suspension components. It just bolts right on to the firewall in place of the original subframe with no welding, just like our highly successful original subframe using our HEIDTS suspension package. This one includes fully adjustable coil-over shock assemblies, with chrome springs. The billet aluminum coilovers are offered in both plain and polished finish and are fully adjustable in rebound, and spring rate selection. (This subframe also includes many other standard features such as tubular control arms, 11"disc brakes, manual rack & pinion steering, motor mount stands welded in place and firewall tubes with shims.) The list of options is the largest in the industry. Options unique to HEIDTS include narrowed control arms (for those wide hides), and adjustable firewall tubes which do not use shims. And for those who have to have the most of everything, HEIDTS offers our 12" Big Brakes or our 13" 6 piston monster brakes! This particular brake package is a special configuration designed at HEIDTS which does not move the wheels out. Very important if you are using narrowed arms to bring the wheels in. It is offered with black or polished calipers. Other options include power steering, polished stainless steel control arms, polished 4 piston calipers for the 11" brakes, polished billet hubs, dropped spindles, sway bar, and inner fender panels. HERE'S WHAT YOU GET IN OUR KITS:

- Main crossmember T.I.G. welded for maximum strength and great looks.
- Adjustable tubular arms.
- 11" Disc brake vented rotors (choose either Ford or Chevy bolt pattern).
- Adjustable coil-over shocks with chrome springs.
- Front-mount rack & pinion steering.
- Stainless steel adjusters with urethane bushings.
- Factory ball joints and tie rod ends.

510140 62-67 Nova Classic update kit \$569.00.
 Classic Update Kits give you one of the most complete kits on the market to "Make Wiring THAT Easy". They are designed for specific year, make, and model configurations. The 1962-1967 Chevy Nova Kit is no exception. The kit boasts 14 features making it the most complete system of its type in the industry including:

- New headlight switch with internal 30amp circuit breaker, retention collar nut, adjustable length shaft, and custom knob.
- Standard turn signal flasher, hazard flasher and horn relay mounted on harness.
- NEW compact ATO-Style fuse panel that is fully encased in a closed box assembly with two mounting pads. The fuse coverlid is labeled on the inside identifying all circuits by description and their respective fuse ratings. All high amperage output circuits incorporate the same superior spring steel reinforced terminals that are used in our Highway Series kits. This kit also utilizes a remote bulkhead assembly that mounts in the stock location. All required hardware supplied. Harness is laid out and formed to allow for nearly all after market accessories such as; gauge packages, wiper systems, heat and air conditioning systems, etc.
- Original switch connector bodies - an American Autowire exclusive feature.
- Steering column connectors can plug directly into most aftermarket steering columns or stock 1962-67 GM columns that use stock GM turn signal switches.
- Separate under dash courtesy lamps for use along with your original dome/interior lighting.
- Instrument Cluster wiring is designed with a "cluster harness disconnect" system for easy service and assembly. Original terminals, connectors (another American Autowire exclusive), and light sockets are supplied for stock cluster connections. The system will also connect into most popular aftermarket gauges such as AUTOMETER, CLASSIC INSTRUMENTS, DAKOTA DIGITAL, STEWART WARNER, VDO and others.
- Rear body harness assembly plugs into the main harness in the stock location and our longer leads allow for stock or custom routing the wires. Rear body wiring includes backup lamp, stop, turn and tail lamp lead wires along with their correct light sockets, license plate lamp connection wire, and fuel tank sender wire and connection along with the proper trunk floor grommet.
- New floor dimmer switch is provided. Wire length and connection accommodate original floor mount dimmer switch.
- New ignition switch, tumbler and key are provided.
- GM bulkhead connectors for the engine and front light wiring are included (another American Autowire exclusive) and allow for easy installation with original or custom routing.

- Engine wiring includes connectors for original points type as well as H.E.I. distributors. Power and tach connectors supplied for GM H.E.I. distributors. Alternator connectors are supplied for GM "SI" series internally regulated alternators. GM "CS" series alternator adapter is available separately.
- Front lighting includes extra long leads that can be routed for stock or optional appearances. All headlight, park light and directional light connectors and terminals are provided along with a switched trigger wire for an electric fan relay (usually recommended with AC).
- Original style light sockets, connectors, terminals, etc. packed into every aspect of this harness, it makes it the most complete system of its type in the industry!
